The possibilities are **Infinite!**

InfiniteGIS

InfiniteGIS provides the necessary tools to allow administrators, office employees, and field staff to manage their assets and infrastructure through a secure, web based GIS application.

Key benefits of **InfiniteGIS**

- **Anywhere, any time, any device**
- **Secure** access
- No software licensing
- **All-Inclusive**; everything in one application
- Retain **historical** records
- Retain **institutional** knowledge
- **Create and edit** features
- GPS | **accurate** field locations
- Minimal training – intuitive interface
- **Public or private** – you decide
- **Free**, regularly scheduled user group

We call it InfiniteGIS because the possibilities truly are infinite! Subscribers to InfiniteGIS will have secure access to their GIS data from ANYWHERE, at ANY TIME, on ANY DEVICE!

GRāEF

collaborate
formulate
innovate

The possibilities are **Infinite!**

InfiniteGIS

Users with necessary permissions can create features, perform inspections, track repairs, and upload and link pictures and documents. Dynamic layers in InfiniteGIS automatically update based on user input and maintenance functions.

The best organization available in **Work Order Management**

- Record an inspection to automatically generate needed repairs
- Assign workers to needed repairs
- Workers search for assigned repairs
- Record who worked on a repair to calculate labor cost
- Use materials from inventory to calculate material cost
- View and manage inventory transactions to see what was used for repairs

Streamline your utility management with intuitive software that allows employees to communicate at every step in the process.

The possibilities are **Infinite!**
